SECTION 4 FIRST AID MEASURES

Inhalation: Move person to fresh air and keep at rest in a position comfortable for breathing. If breathing is labored, administer oxygen. If systems persist, contact a POISON CENTER or doctor/physician.

Skin contact: If on skin, wash thoroughly with soap and water. If on clothes, remove clothing. Get medical attention if irritation develops and persists.

Eye contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Keep eyes wide open and continue rinsing. Get medical attention if irritation develops and persists.

Ingestion: Effects of ingestion are unknown. Never give anything by mouth to an unconscious person. Drink water to reduce effects of ingestion. Seek medical attention immediately and follow instructions given.

Most important symptoms/effects, acute and delayed: May cause stinging of eyes and/or irritation. Prolonged and repeated skin exposure may be irritating to some people.

Indication of immediate medical attention and special treatment needed:
If ingested: Immediately seek medical attention. Provide general supportive measures and treat symptomatically. Keep victim under observation.

General information:
More affected persons from dangerous area. Do not leave victim unattended. Ensure that medical personnel are aware of the material(s) involved. Show this safety data sheet to the doctor in attendance.

SECTION 5 FIRE FIGHTING MEASURES

Suitable extinguishing media:
Non-combustible. Use media appropriate for surrounding fire.

Unsuitable extinguishing media:
None known.

Specific hazards arising from the chemical:
Thermal decomposition may evolve toxic and/or irritant vapours. Forms fumes of oxides of carbon and nitrogen.

Special protective equipment and precautions for firefighters:
None known. Use personal protective equipment appropriate for surrounding fire.

Fire-fighting equipment/instructions:
Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapour pressure build up.

Specific methods:
Use standard fire-fighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.

General fire hazards:
None known.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe vapours. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them.

Environmental precautions:
Avoid release to the environment. Avoid discharge into drains, water courses or onto the ground. Prevent further leakage or spillage if safe to do so. Inform appropriate managerial or supervisory personnel of all environmental releases.

Methods and materials for containment and cleaning up:
Contain spillages and then collect with sand, earth, diatomaceous earth, vermiculite, or any other suitable adsorbent material. Collect spillage. Transfer to a container for disposal or recovery. Following product recovery, flush area with water. If

possible prevent water running into sewers. For waste disposal, see section 13 of the SDS.

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling:

Avoid contact with skin and eyes. Wear appropriate personal protective equipment. Smoking, eating and drinking should be prohibited in the application area. Wash hands thoroughly after handling. Avoid release to the environment. Observe good industrial hygiene practices. When opening containers, do so slowly to vent slight pressure that may build up after prolonged storage.

Advice on protection against fire and explosion:
None – Product is non-combustible

Conditions for safe storage, including any incompatibilities:

Keep out of reach of children. Keep container tightly closed in a dry and well-ventilated place. Keep cool. Do not store in temperatures above 50° C. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions.
